U.N. Votes For French Withdrawal

Resolution Asks Troops Pullout From All Tunisia

UNITED NATIONS, N.Y. (AP) — Without a single dissenting voice, the U. N. General Assembly demanded Friday night that France pull her troops back into her base at Bizerte and negotiate to give the base up to Tunisia.

The assembly adopted a resolu-tion to that effect by a vote of 68-0 with 30 abstentions. Three countries were absent.

Sen. Adcock's Integrity

Political horse trading" or "log rolling" as it is sometimes called I is a device used in police juries, state legislatures and Congress where an official supports one measure in order to gain support for another.

We don't know who has the distinction of starting this "buddy system" in the many levels of our government, but apparently it is here to stay. Such actions may at times seem ridiculous if carried to th extremes, but they are not illegal nor do they constitute a bribe or a "sellout."

The particular case in question concerns State Senator Jamar Adcock's support of the proposed new Governor's Mansion for six improvement projects in Ouachita and Jackson parishes.

This is no deal made behind the scenes. Senator Adcock issued a statement to News-Star-Morning World reporter Sam Hanna as soon as the agreement with Governor Davis was made. Adcock listed the projects slated to be carried out in the two parishes. Then he said:

"In the interests of the people of the two parishes I represent I think there are times when I should believe in practical politics.

"The chances of the mansion issue being approved by the Legislature are good. So why shouldn't I try to get those things trat are needed most in Quachita and Jack-

On the local end were the following projects:

1. Repair of the Jonesboro Road

from West Monroe to Jonesboro. 2. Asphalt overlay on the Old Arkansas Road outside West Mon-

roe in Ouachita Parish. 3. Additional land and buildings for Northeast State College in Mon-

4. A sum of \$600,000 or more for the Ouachita Valley Vocational Technical School in West Monroe.

5. Additional state aid for street improvements in West Monroe and "rural parts" of Ouachita Parish. 6. Future construction of a "ma-

jor" state office building or institution in West Monroe. At least four of the six projects

-including the street and road improvements and the additional land for Monroe's expanding state college-fall into the urgent category. Senator Adcock and many others in his two-parish area have favored all of the projects for some time.

In open and above-board manner. Adcock saw a chance to secure the state administration's green light without sacrificing any personal

As pointed out above, political "horse trading" can reach a point where it becomes a farce. This point is reached, however, when an official loses sight of his specific duty to represent his constituents.

Senator Adcock never lost sight of position, his integrity or the people he represents. And he made public his agreement with the Governor the moment it was reached. This has always been the policy of the senator. He has always dealt across the board, with no hiding of his activities.

Government By Default

Italy is enjoying a gold rush. It has over three billion dollars in its own Fort Knox. Italy has so many American companies investing here, it has become a haven for U.S. efficiency experts, management training experts, time and motion study experts.

In fact Italy has reached the greatest rate of increase in its income and gross national product in the world. Italy as a nation is getting rich—yet the Communist Party is getting bigger bit by bit. Furthermore its strength is in the high income areas. It's obviously not poverty but propaganda and organization that makes a successful party.

The Italian government machinery has become too big for the government itself. It is strangling itself and its people in red tape. This angers the citizenry and creates a massive protest vote-the Communist-left wing Socialist vote. The red tape is just one of the hundreds of irritations. But it's typical.

There are in this lovely land many firms which specialize in desnafu-ing business. Their sole speciality is unraveling red tape. These are private businesses. Without them many government bureaus and the citizenry could never get together.

There are at least eighty, per-

haps a hundred, social security, pension and other government agencies here. There is no single deduction for Social Security as in our country. The rate differs. Steelworkers have one rate; sailors another—so the agencies mul-

Suppose that a worker doesn't get his check or must make contact with the proper government agency for some reason.

Well, he just doesn't send a letter or go up to the window and complain or demand action. He goes to the private firm which specializes in de-snafu-ing that particular government agency. Otherwise he would get nowhere. The government bureau just wouldn't bother with him, or it would get him so snarled in red tape it literally would take several years to settle the matter.

But the private citizen doesn't pay the de-snafu-ing corporation. The government pays his fee.

In other words, the government realizes that many of its bureaus are so choked with red tape, it needs the help of private service firms to unravel it. Government is so big that governing appears to have become too big for the government itself.

And this is just one of a thousand instances and frustrations the Communists exploit.

'Low-Priced' Stocks

Responsible people in the securities industry, contrary to a more or less popular misconception, are thoroughly opposed to thoughtless speculation.

For instance, Keith Funston of the New York Stock Exchange has issued a warning that should be listened to by all investors. In his words, "There still seems to be a preoccupation with 'low - priced' shares because they are low-priced; and an unhealthy appetite for 'new issues' of unseasoned companies merely because they are new. As experienced investors have long known, neither 'low price' nor 'new issues' are guarantees of anything -except perhaps, a proportionately greater degree of risk."

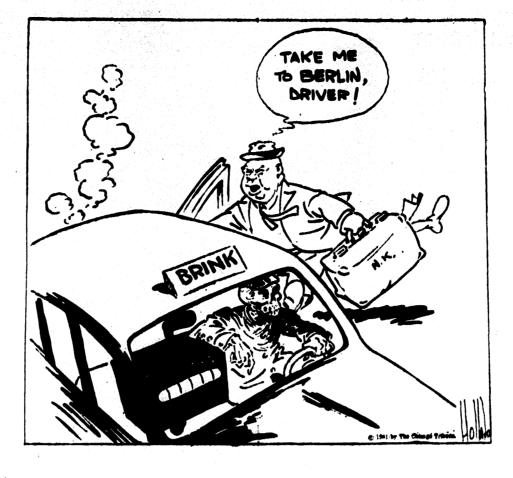

Mr. Funston adds that some new

offerings are greeted clamorously by people who tell their brokers, in effect, "Don't bother me with the facts, get me some of that stock."

This—like buying on tips and rumors and high-powered wire and phone solicitations—is a sure road to financial disaster. There are no substitutes for knowledge and caution and thought when it comes to investing. An that applies to old companies and new, and to shares in any price range.

Tax Foundation, Inc. says that the federal government's worldwide real and personal property assets rose to a record \$276 billion in fiscal 1960, and Uncle Sam paid a rental charge of \$174.3 million in that year.

Democrats Irate At Bailey

Congressmen Given Brush-Off On Colorado River Project

WASHINGTON - Democratic National Chairman John Bailey is increasingly getting into hot water with members of his party in Congress and elsewhere, and for a good reason.

They feel that Bailey and his licutenants are indifferent to their local, but to them highly important, political interests.

Latest explosive instance of that, involving a controversial major Western public power project, is causing much backstage sputtering. Important senators and congressmen are making no bones of their resentment - an attitude decidedly not helping President Kennedy in his strenuous efforts to enact the embattled foreign aid and aid - to - education measures.

Some of the lawmakers are irately talking of taking this National Committee episode directly to the President.

One reason is that a number of them recently spent an evening bluntly berating Bailey personally for ignoring their political prob-lems, apparently without making much dent on him and his assist-

On the other hand, when Senator Pat McNamara, Mich., protested to the President about the appointment of a former Republican State Chairman to a federal judgeship, McNamara was immediately assured "that will be tak- them, particularly as the Admin-

en care of" - and it has been. The appointment is now buried in the Senate Judiciary Committee.

Cause of the latest backstage ruckus is a curt brush-off Deputy Chairman Charles Roche gave a Colorado delegation that sought Bailey's support to put through Congress a \$14 million grant for the Colorado River Water Storage Project.

The money is for a network of federal transmission lines to link rural electric co-ops and public power developments in Colorado. New Mexico and Arizona.

Former Interior Secretary Fred Seaton recommended this project. and President Eisenhower included it in his final budget. President Kennedy and his Budget Director fully reaffirmed that.

Private utilities are vehemently opposing the transmission line Although it has received little

public attention, this private versus public power clash is one of hottest on Capitol Hill. HOW TO LOSE VOTES - Several score Colorado small businessmen, ranchers and REA officials came to Washington to buttonhole lawmakers in behalf of

Goat Of Family One Of Children Often Asked To Bear Load Of Aged Parent

DR. PETER J. STEINCROHN

So often in medical practice I have seen evidence of one family member having to assume responsibilities that the others evade. As many have said to me: "I know I'm being made the goat, but what can I do?" Anyone with elderly parents the problems that arise. Here, for example, is such a letter from a distressed reader, Mrs. W., of New Jersey.

Dear Dr. Steincrohn: I feel as if I have come to the end of the road and keep thinking suicide is my only solution. I have a mother of 86. Her mind is like a child's and she is very difficult to please.

She is so confused. I have been advised to put her in a home, but I cannot bring myself to do that. My mother and I have been very close. In years back she was so kind thoughtful, always willing to help any one in trouble. Her door was always open.

Now all doors are closed to her and invitations are rare. I have a sister, but she wants nothing to interfere with her own family life. She never would take mother in for even a day. I have lost many of my friends

as I am nervous and they don't understand what a terrific nervous strain and tension I am undergoing.

Is there any solution to my de pressed state of mind? I must work and my work is becoming very difficult under the circumstances. I would be ever so grateful for some advice. Sincerely, A: I don't know enough about

you or sister - or even about your mother — to be able to give you specific advice. Are you mar-ried? Is your husband living? Any children? What are your financial circumstances? Does your sister have similar home conveniences? An extra room? Grown or little children?

The decision to send an aged parent to a home for the elderly can be a soul-trying experience. However, it is an answer that the family members can rarely make in a dispassionate and sensible manner. Sometimes a home is better for all concerned than keeping a mother or father in

the midst of turmoil. What does your doctor advise? Has she said she is well enough to live with you do. I would not think of parting with her. As for your sister, I hope she

A small delegation was sent to call on him. They were told Bailey was "out", and were referred to

Deputy Chairman Roche - former Boston newsman and publicity agent. In the 1960 campaign. handled press relations for the "Citizens for Kennedy - Johnson Committee.' Apparently as a reward for these labors, he was recently

named Deputy National Chairman. But to the Colorado delegation, he quickly made it clear he knew little about their project - and cared less.

Obviously bored, Roche listened to them with ill - concealed indifference. Finally one of the delegates, a well - to - do rancher, exploded.

"This is an Administration project," he hotly told Roche. "It was started by the Eisenhower Administration, and President Kennedy thought so much of it that he included it in his budget. A great many voters are interested in this project that directly affects the future development of three states. Now if you people

here aren't "
"Look," snapped Roche, "you people weren't for us in 1960, so why should we do anything for

you now?" "Mr. Roche, if you were a smart politician," was the retort, 'you would know two things. Never chew over old elections, and there are always new elections coming up. There is an election in 1962, and another in 1964. You may find that in both of them you would like very much to have

our help."
With that, the delegates picked up their hats and walked out to indignantly relate their experi-

ence to congressional friends. Note At Chairman Bailey's disconcerting dinner meeting several weeks previous, Senator Ernest Gruening, D., Alaska, caustically told him. "The way the Administration is acting in my state, it is apparently not interested in electing Democrats. And it won't, if it keeps on as it is."

POLITICALS — Republican leaders think National Chairman William Miller did so well in his debate with Democratic Chairman Bailey that they are urging these encounters be put on a monthly basis. Following the debate, Miller received 357 letters and \$427 in contributions, although he did not ask for funds. Bailey says he got 986 responses with \$7,264 in contributions nate Democratic Leader Mike Mansfield, Mont., usually has

GEORGE SOKOLSKY Canada And Cuba

Canadian Airlift Cannot Hurt The United States

The Canadian airlift to Cuba a sale and it does not matter to makes no sense. The business is not large enough to justify the inevitable loss of American friendship. To most Americans, it looks like spite and spite is cheap, no matter why it is done or by whom.

The Cubans are, of course, taking every advantage of the Canadians because they assume that the Canadians are greedy and are willing to make any sacrifice to get business. The best example is the use of Cuban-hired Canadian planes rather than shipping on Canadian freight planes. I quote an instance from "The Financial Post" of Toronto:

"One airline — World-Wide Airways Inc. of Montreal — holds an Air Transport Board license to airlift freight from Canada to

"Company complains it's not getting any business, and a DC-4 sits idle at Montreal airport.

"Another airline - International Airfreighters Ltd. of Edmonton - bought a North Star plane from Trans-Canada Air Lines in May, assembled Canadian airmen. 'dry leased' the plane and to Cubana (the Cuban air-

"This company has been mov-ing practically all of the Canadian aircargo to and from Cuba, and the owners say they are making

What the Canadians expected of the Cubans is hard to say. Cuba is a Communist State and like all Communists, assumes that the capitalists will do anything to get income: that capitalists have no sense of honor or patriotism and that therefore all that is necessary is to hold a carrot in front of a capitalist and he rushes forward even into a cesspool. The Communists assume that the capitalists will kill each other off economically and that will result in a bloodless victory for World Marxism.

The Air Industries and Transport Association of Canada has urged the Canadian government "act, immediately, to withdraw permission for further Cuban flights until such time as the Cuban government agrees to live up to a firm understanding."

The Canadians thought that they had a 50-50 deal with the Cubans but they now discover that they have been done in. There are always selfish business men who adopt the attitude that a sale is

whom or what for. They are like some American companies who situate branches in European countries so that they can sell to Soviet Russia, in absolute betrayal of their own country. On Sunday. 1,500 American boys risked their lives by riding into West Berlin along a 110-mile lane of peril: they might have been shot down by steel manufactured by American-owned plants situated in European countries. This nobody seems to think about these days when the competition for the dollar in all markets is becoming so

The Cubans, being Marxists, figure on that attitude on the part of Canadian sellers of chicks and pigs and other footstuffs which are flown from Canada to Cuba. Sell anything to any buyer is a good rule unless the buyer turns around to kill the customer. This has been happening with astonishing regularity during the past 40 years. Americans may have forgotten that when this country was short of steel iron scrap, the Sixth Avenue railroad scrap, an enormous amount, was sold to Japan which shortly thereafter went to war against us

No American can develop much sympathy for any Canadian who loses by his trading with Cuba. The Canadians went into the Cuban market with the intention of capturing an American market even if to do so meant to hurt the United States. Canada cannot hurt the United States much; it can hurt Canada more in the long run. Suffering from false pride and petty nationalism, there are those in Canada who believe that it does not matter that they damage United States - Canadian relation: that the United States will take anything that comes along. The truth is that the American people are weary of being abused by countries which depend upon American capital for their development and the American market for their trade.

The Cuban problem has become for us also a Canadian problem. Canada is so absorbed by the absurd notion that a small nation can compete successfully with an enor mous nation, such as the United States is, that the United States can be sacrificed for the tenuous possibilities of trade with Cuba and Red China. The Canadians can find themselves out on a limb.

Diplomacy Same Today As It Was In Hungary In 1956

some sinister footprints at the scene of a crime only to find they are his own and not the

Our own numskull diplomacy today is only a little different from what it was in Hungary in 1956. I was there as the refugees poured into Austria and West Germany, and I interviewed many of them in detail. My columns infuriated a lot of bodies because I reported that Radio Free Europe, our quais-official voice, had incited the Hungarians to revolt - and left them asking "Where are the Yanks?'

If we didn't do it so blatantly this time, the difference is merely a matter of degree. The New Frontier line on refugees, given to some of us in almost these words, is that the USA will never discourage them from escaping into the free world. Sen. Adcock's Integrity

Political horse trading" or "log rolling" as it is sometimes called is a device used in police juries, state legislatures and Congress where an official supports one measure in order to gain support for another.

We don't know who has the distinction of starting this "buddy system" in the many levels of our government, but apparently it is here to stay. Such actions may at times seem ridiculous if carried to extremes, but they are not illegal nor do they constitute a bribe or a

The particular case in question concerns State Senator Jamar Adcock's support of the proposed new Governor's Mansion for six improvement projects in Ouachita and Jackson parishes.

This is no deal made behind the scenes. Senator Adcock issued a statement to News-Star-Morning World reporter Sam Hanna as soon as the agreement with Governor Davis was made. Adcock listed the projects slated to be carried out in the two parishes. Then he said: "In the interests of the people of the two parishes I represent I

believe in practical politics. "The chances of the mansion issue being approved by the Legislature are good. So why shouldn't I try to get those things trat are needed most in Ouachita and Jack-

On the local end were the following projects:

1. Repair of the Jonesboro Road

from West Monroe to Jonesboro.

2. Asphalt overlay on the Old Arkansas Road outside West Monroe in Ouachita Parish.

3. Additional land and buildings for Northeast State College in Mon-

4. A sum of \$600,000 or more for the Ouachita Valley Vocational Technical School in West Monroe.

5. Additional state aid for street improvements in West Monroe and "rural parts" of Ouachita Parish.

6. Future construction of a "major" state office building or institution in West Monroe.

At least four of the six projects -including the street and road improvements and the additional land for Monroe's expanding state college-fall into the urgent category. Senator Adcock and many others in his two-parish area have favored all of the projects for some time.

In open and above-board manner, Adcock saw a chance to secure the state administration's green light without sacrificing any personal

As pointed out above, political "horse trading" can reach a point where it becomes a farce. This point is reached, however, when an official loses sight of his specific duty to represent his constituents.

Senator Adcock never lost sight of position, his integrity or the people he represents. And he made public his agreement with the Governor the moment it was reached. This has always been the policy of the senator. He has always dealt across the board, with no hiding of

Government By Default haps a hundred, social security, Italy is enjoying a gold rush. It

has over three billion dollars in its own Fort Knox. Italy has so many American companies investing here, it has become a haven for U.S. efficiency experts, management training experts, time and motion study experts.

In fact Italy has reached the greatest rate of increase in its income and gross national product in the world. Italy as a nation is getting rich-yet the Communist Party is getting bigger bit by bit. Furthermore its strength is in the high income areas. It's obviously not poverty but propaganda and organization that makes a successful party.

The Italian government machinery has become too big for the government itself. It is strangling itself and its people in red tape. This angers the citizenry and creates a massive protest vote-the Communist-left wing Socialist vote. The red tape is just one of the hundreds of irritations. But it's typical.

There are in this lovely land many firms which specialize in desnafu-ing business. Their sole speciality is unraveling red tape. These are private businesses. Without them many government bureaus and the citizenry could never get together.

There are at least eighty, per-

pension and other government agencies here. There is no single deduction for Social Security as in our country. The rate differs. Steelworkers have one rate; sailors another-so the agencies mul-

Suppose that a worker doesn't get his check or must make contact with the proper government agency for some reason.

Well, he just doesn't send a letter or go up to the window and complain or demand action. He goes to the private firm which specializes in de-snafu-ing that particular government agency. Otherwise he would get nowhere. The government bureau just wouldn't bother with him, or it would get him so snarled in red tape it literally would take several years to settle the matter.

But the private citizen doesn't pay the de-snafu-ing corporation. The government pays his fee.

In other words, the government realizes that many of its bureaus are so choked with red tape, it needs the help of private service firms to unravel it. Government is so big that governing appears to have become too big for the government itself.

And this is just one of a thousand instances and frustrations the Communists exploit.

'Low-Priced' Stocks

Responsible people in the securities industry, contrary to a more or less popular misconception, are thoroughly opposed to thoughtless speculation.

For instance, Keith Funston of the New York Stock Exchange has issued a warning that should be listened to by all investors. In his words, "There still seems to be a preoccupation with 'low - priced' shares because they are low-priced; and an unhealthy appetite for 'new issues' of unseasoned companies merely because they are new. As experienced investors have long known, neither 'low price' nor 'new issues' are guarantees of anything -except perhaps, a proportionately greater degree of risk."

Mr. Funston adds that some new

offerings are greeted clamorously by people who tell their brokers, in effect, "Don't bother me with the facts, get me some of that stock."

This-like buying on tips and ru-

mors and high-powered wire and phone solicitations—is a sure road to financial disaster. There are no substitutes for knowledge and caution and thought when it comes to investing. An that applies to old companies and new, and to shares in any price range.

Democrats Irate At Bailey

Congressmen Given Brush-Off On

Colorado River Project

WASHINGTON - Democratic National Chairman John Bailey is increasingly getting into hot water with members of his party in Congress and elsewhere, and for a good reason.

They feel that Bailey and his lieutenants are indifferent to their local, but to them highly important, political interests.

Latest explosive instance of that, involving a controversial major Western public power project, is causing much backstage sputtering. Important senators and congressmen are making no bones of their resentment — an attitude decidedly not helping President Kennedy in his strenuous efforts to enact the embattled foreign aid and aid - to - education measures. Some of the lawmakers are

irately talking of taking this Na-Committee episode directly to the President.

One reason is that a number of them recently spent an evening bluntly berating Bailey personally for ignoring their political prob-lems, apparently without making much dent on him and his assist-

On the other hand, when Senator Pat McNamara, Mich., protested to the President about the appointment of a former Republican State Chairman to a federal judgeship, McNamara was immediately assured "that will be tak-

ruckus is a curt brush-off Deputy Chairman Charles Roche gave a Colorado delegation that sought Bailey's support to put through Congress a \$14 million grant for the Colorado River Water Storage The money is for a network of

federal transmission lines to link rural electric co-ops and public power developments in Colorado, New Mexico and Arizona. Former Interior Secretary Fred Seaton recommended this project

They were advised to get National Chairman Baily to help them, particularly as the Admin-

So often in medical practice I have seen evidence of one family member having to assume responsibilities that the others evade As many have said to me: know I'm being made the goat, but what can I do?" Anyone with elderly parents the problems that arise. Here, for example, is such a letter from a distressed read-er, Mrs. W., of New Jersey.

Dear Dr. Steincrohn: I feel as if I have come to the end of the road and keep thinking suicide is my only solution. I have a moth-er of 86. Her mind is like a child's and she is very difficult to please. She is so confused.

I have been advised to put her in a home, but I cannot bring myself to do that. My mother and I have been very close. In years back she was so kind and thoughtful, always willing to help any one in trouble. Her door was always open.

Now all doors are closed to her and invitations are rare. I have a sister, but she wants nothing to interfere with her own family life. She never would take mother in for even a day.

I have lost many of my friends as I am nervous and they don't understand what a terrific nervous strain and tension I am undergoing. Is there any solution to my de-

pressed state of mind? I must work and my work is becoming very difficult under the circumstances. I would be ever so grateful for some advice. Sincerely, Mrs. W.
A: I don't know enough about

you or sister - or even about your mother - to be able to give you specific advice. Are you mar-ried? Is your husband living? Any children? What are your financial circumstances? Does your sister have similar home conveniences? An extra room? Grown or little

children?
The decision to send an aged parent to a home for the elderly can be a soul-trying experience. However, it is an answer that the family members can rarely make in a dispassionate and sensible manner. Sometimes a home is better for all concerned than

As for your sister. I hope she reads this. I can only say that for the rest of her life she will live with a heavy guilt complex.
I have observed many such peo-

ple who were unwilling to share the burden. Following the death of the parent they wept and wailed (inwardly) for years to come How they wanted a second chance to make amends. It never came

not large enough to justify the inevitable loss of American friendship. To most Americans, it looks like spite and spite is cheap, no matter why it is done or by whom.

The Cubans are, of course, taking every advantage of the Canadians because they assume that the Canadians are greedy and are willing to make any sacrifice to get business. The best example is the use of Cuban-hired Canadian planes rather than shipping on Canadian freight planes. I quote an instance from "The Financial Post" of Toronto:

The Communists assume that the capitalists will kill each other off economically and that will result a bloodless victory for World

The Air Industries and Transport Association of Canada has urged the Canadian government "act, immediately, to withdraw permission for further Cuban permission for flights until such time as the Cuban government agrees to live up to a firm understanding."

The Canadians thought that they had a 50-50 deal with the Cubans but they now discover that they have been done in. There are al-

adopt the attitude that a sale is

The Canadian airlift to Cuba a sale and it does not matter to makes no sense. The business is whom or what for. They are like some American companies who situate branches in European countries so that they can sell to Soviet Russia, in absolute betraval of their own country. On Sunday, 1,500 American boys risked their lives by riding into West Berlin along a 110-mile lane of peril; they might have been shot down by steel manufactured by American-owned plants situated in European countries. This nobody seems to think about these days when the competition for the dol-lar in all markets is becoming so

> The Cubans, being Marxists figure on that attitude on the part of Canadian sellers of chicks and pigs and other footstuffs which are flown from Canada to Cuba. Sell anything to any buyer is a good rule unless the buyer turns around to kill the customer. This has been happening with astonishing regularity during the past 40 years. Americans may have forgotten that when this country was short of steel and iron scrap, the Sixth Avenue railroad scrap, an enormous amount, was sold to Japan which shortly thereafter went to war against us.

No American can develop much sympathy for any Canadian who loses by his trading with Cuba. The Canadians went into the Cuban market with the intention of capturing an American market even to do so meant to hurt the United States. Canada cannot hurt the United States much; it can hurt Canada more in the long run. Suffering from false pride and petty nationalism, there are those in Canada who believe that it does not matter that they damage United States - Canadian re lation; that the United States will take anything that comes along. The truth is that the American people are weary of being abused by countries which depend upon American capital for their development and the American market for their trade.

The Cuban problem has become for us also a Canadian problem. Canada is so absorbed by the absurd notion that a small nation can compete successfully with an enor mous nation, such as the United States is, that the United States can be sacrificed for the tenuous possibilities of trade with Cuba and Red China. The Canadians can find themselves out on a limb.

Victims of ringworm of the scalp should cut, clip, or shave the hair at weekly intervals while undergoing treatment. In this way, living fungi on the hair shaft are eliminated and reinfecis avoided. Infected nails should be kept short for the same reason. Some physicians suggest surgical removal of the entire nail shortly after the drug is started.

Tinea refers to any ringworm nfection. The word is followed by another which describes the location of the lesions. Thus tinea capitis is the ordinary ringworm of the scalp that afflicts so many children. Tinea harhae is involved and a constitutional provision prochildren. Tinea barbae is involvement of the beard, better known as barber's itch. Tinea cruris affects the groin and tinea corporis other parts of the body. Tinea pedis (athlete's foot) is the most common fungal disease.

The names of the ringworm micro - organisms are even more difficult to spell and pronounce. All are related but tend to stay in their own back yard. Those that favor the feet, for example, seldom attack the scalp or chest, and vice versa.

Miss DeLaune Feted With Tea Shower

Miss Suzanne Marie DeLaune was honoree on Saturday afternoon August 10 at a festive tea shower in the home of Mrs. J. E. Blunschi of Ferriday, Louisiana.

Hostesses with Mrs. Blunschi were Mrs. Lloyd Love, Mrs. Herman Gibson, Jr., Mrs. W. W. Turner, Mrs. Arch Turner, Mrs. Woodie Davis and Mrs. Marsh Hayden.

Receiving with the brideelect, wearing a pink silk organza afternoon frock with a corsage of small white rose buds, were her mother, Mrs. Gerald DeLaune and Mrs. O. Hill, mother of the prospective groom.

A blue and white color theme was reflected in the decorations of the Blunschi home. The refreshment table, overlaid with an imported cut work cloth, held a pyramidal assortment of white chrysanthemums and gladioli interspersed with fern. The hostesses alternated at the punch and tea services.

Gifts were displayed in the den which adjoined a flower filled enclosed patio and fountain. The den was gaily decorated with assorted summer flowers.

Dear Ann Landers: Judy who wrote to you in tears because her mother refused to accept money as a gift, brought back some bitter memories for me.

As a child I, too, went without unches and little things I wanted so that I could save my allowance to buy gifts for my mother. Later, when I married I was able to buy her lovely presents, and I did so-often. Now I am almost 55 years old and I cannot recal a single gift that my mother said

She criticized and found fault with every present. She some-times took gifts back and exchanged them for something else, but usually she got a cash refund.

The Man Who Knows The Way A Woman Wants To Look

DEAR ABBY

By Abigail Van Buren

He told me one time that he didn't like to see me with a "headful of iron," as he put it. I thought I could match colors My hair is very straight, and I have to use those large rollers. Well, last Sunday he blew his stack. He came over and I had those rollers in my hair, so he left early and went bowling with a boy friend.

A B B Y: My problem is a very upsetting one. I can't match colors for the life of me, match colors for the life of me is match colors for the life of me. I thought I could match colors pretty well, but I guess I can't, because almost every time I go out in public, someone says something about the way my colors clash. Is there some rule I can't match colors for the life of me. I thought I could match colors for the life of me. I thought I could match colors for the life of me. I thought I could match colors pretty well, but I guess I can't, because almost every time I go out in public, someone says something about the way my colors clash. Is there some rule I can't match colors for the life of me. State Audit Changes Are Given Study

BATON ROUGE (AP)—A Little VACATION over! Child care, near lege. Rates reasonable. FA 5-2119. said Friday it is studying the ATTENTION SOUTHSIDE possibility of consolidating the state's auditing functions, now handled by several different of-

Rep. Edward Lebreton, chairman of the Subcommittee on Organization, Services and Operamade narrow, FA 3-6615. ganization, Services and Operations, said abolition of the separate office of comptroller "is not beyond the realm of possibility."

The New Orleans lawmaker said the subcommittee also is studying the possibility of making the office of supervisor of public funds answerable to the legislature instead of the administration.

The supervisor of public funds checks on funds already spent from legislative appropriations. The comptroller's office is concerned with the state's current financial condition.

Pre-auditing, or studying the financial possibilities for the future, nancial possibilities for the future, by the division of administration under the governor. Lebreton said the study included the possibility that all preauditing and current auditing (7) Lost And Found should be put under one oper-

ation. The possible moves were men tioned at a news conference. Lebreton said the subcommittee has been dividing up its work and he has been spearheading work in

auditing. Other proposed changes being st u die d by the subcommittee would affect the State Department of Agriculture, Department of Labor and the Liquified Petroleum Gas Commission. A change in vote machine and registration functions also is under study.

The Little Hoover Commission (8) Automobile Agencies has been seeking ways to economize and streamline state govern ment

Lebreton pointed out the subcommittee is not recommending at this time that any of the changes be made. The committee only is studying them.
